TOMUS XL — 1978 — 40. KÖTET

Adhikary, D. N., *cf.* Kishore, N. and Adhikary, D. N. ..... 285—290
Anderson, Joel, Bunce, John W., Deddens, James A. and **Williams, J. P.**, C^*-algebras and derivation ranges ..... 211—227
Berberian, S. K., Produit de convolution des mesures opératorielles ..... 3—8
Bunce, John W., *cf.* Anderson, Joel, Bunce, John W., Deddens, James A. and Williams, J. P. 211—227
Ceauşescu, Z. and **Foiaş, C.**, On intertwining dilations. V. ..... 9—32
Coquet, Jean, Sur certaines suites pseudo-aléatoires ..... 229—235
Deddens, James A., *cf.* Anderson, Joel, Bunce, John W., Deddens, James A. and Williams, J. P. ..... 211—227
Dickmeis, W., Nessel, R. J., Classical approximation processes in connection with Lax equivalence theorems with orders ..... 33—48
Duggal, B. P., Near normality of a class of transforms ..... 237—242
Erdös, P. and **Sárközy, A.**, On products of integers. II ..... 243—259
Foiaş, C., *cf.* Ceauşescu, Z. and Foiaş, C. ..... 9—32
Foiaş, Ciprian, *cf.* Sz.-Nagy, Béla and Foiaş, Ciprian ..... 163—167
Fried, E., A note on congruence extension property ..... 261—263
Fried, E. and **Grätzer G.**, On automorphisms of the subalgebra lattice induced by automorphisms of the algebra ..... 49—52
Fried, E. and **Sichler, J.**, On automorphism groups of subalgebras of a universal algebra 265—270
Furuta, Takayuki, Convexoid operators and generalized growth conditions associated with unitary ϱ-dilations of Sz.-Nagy and Foiaş ..... 53—61
Grätzer, G., *cf.* Fried, E. and Grätzer G. ..... 49—52
Hatvani, L., Attractivity theorems for nonautonomous systems of differential equations 271—283
Hille, E., Second order Briot—Bouquet differential equations ..... 63—72
Jafarian, A. A. and **Radjavi, H.**, Compact Operator Ranges and Reductive Algebras 73—79
Kim, Ki Hang and **Roush, Fred W.**, Counting additive spaces of sets ..... 81—87
Kim, Ki Hang and **Roush, Fred W.**, Quasi-varieties of binary relations ..... 89—91
Kishore, N. and **Adhikary, D. N.**, Dependence of associativity conditions for ternary operations ..... 285—290
Kollár, J., Automorphism groups of subalgebras; a concrete characterization ..... 291—295
Krotov, V. G. and **Leindler, L.**, On the strong summability of Fourier series and the classes H^ω ..... 93—98
Lajos, S., Characterizations of completely regular elements in semigroups ..... 297—300
Leindler, L., *cf.* Krotov, V. G. and Leindler, L. ..... 93—98
Lieberman, A., Entropy of states of a gage space ..... 99—105
Losert, V., Uniformly distributed sequences on compact, separable, non metrizable groups 107—110
Л. Медеши, Построение полугрупповой амальгамы, независимо вложимой в полугруппу ..... 111—120

Migliorini, F. and **Szép, J.,** On a special decomposition of regular semigroups ..... 121—128
Mitsch, H., Derivations and translation on l-semigroups ..... 301—308
Moór, A., Otsukische Übertragung mit rekurrentem Masstensor..... 129—142
Móricz, F., Multiparameter strong laws of large numbers. I (Second order moment restrictions) ..... 143—156
Müller, V., On Jordan models of C_0-contractions ..... 309—313
Müller, Winfried B., Differentiations-Kompositionsringe ..... 157—161
Mysior, A., A remark on Gehér's theorem ..... 315—316
Németh, J., Necessary and sufficient conditions for imbedding of classes of functions 317—326
Nessel, R. J., *cf.* Dickmeis, W. and Nessel, R. J. ..... 33—48
Quinkert, R., Über Schreiersche Gruppenerweiterungen und ihre Kommutatorgruppen 327—345
Radjavi, H., *cf.* Jafarian, A. A. and Radjavi, H. ..... 73—79
Richmond, B. and **Szekeres, G.,** The Taylor coefficients of certain infinite products..... 347—369
Roush, Fred W., *cf.* Kim, Ki Hang and Roush, Fred W. ..... 81—87
Roush, Fred W., *cf.* Kim, Ki Hang and Roush, Fred W. ..... 89—91
Sárközy, A., *cf.* Erdős, P. and Sárközy, A. ..... 243—259
Sebestyén, Z., On extendibility of $*$-representations from $*$-ideals ..... 169—174
Shields, Allen L., On Möbius bounded operators ..... 371—374
Sichler, J., *cf.* Fried, E. and Sichler, J. ..... 265—270
Skornjakov, L. A., Unary algebras with regular endomorphism monoids ..... 375—381
Szabó, L., Concrete representation of related structures of universal algebras. I ..... 175—184
Szekeres, G., *cf.* Richmond, B. and Szekeres, G. ..... 347—369
Szép, J., *cf.* Migliorini, F. and Szép, J. ..... 121—128
Sz.-Nagy, Béla and **Foiaş, Ciprian,** On injections, intertwining operators of class C_0 .... 163—167
Tafel, W., Voigt, J. and **Weidmann, J.,** The singular sequence problem ..... 383—388
Teodorescu, Radu I., Factorisations régulières et sous-espaces hyperinvariants ..... 389—396
Voigt, Jürgen, *cf.* Tafel, W., Voigt, J. and Weidmann, J. ..... 383—388
Weidmann, J., *cf.* Tafel, W., Voigt, J. and Weidmann, J. ..... 383—388
Williams, J. P., *cf.* Andrson, Joel, Bunce, John W., Deddens, James A. and Williams, J. P. 211—227
Williams, L. R., A quasisimilarity model for algebraic operators ..... 185—188
Wu, Pei Yuan, Jordan model for weak contractions ..... 189—196

BIBLIOGRAPHIE
